Member Business Solutions Introduces New Start-up Kit

Member Business Solutions, LLC (MBS), has designed a new start-up kit to assist loan managers and project managers tasked with researching and starting a business services program. The kit functions as a resource library and includes topics such as deposit accounts, lending, marketing and training. To help new and existing MBS partners implement a comprehensive business services program it also contains sample policies and procedures, video clips, frequently asked questions and checklists to help credit unions get their business services program up and running quickly. The start-up kit resides in the Partner area of MBS' web site at www.mbsllc.org.

"We have assisted hundreds of credit unions over the years to familiarize them with business services and most of this information is archived in the start-up kit area. Having the information available on demand will be a great asset for everyone," said Jim Gallagher, President of MBS.

Now in its 7th year of operation, MBS has helped credit unions underwrite more than \$1.3 billion dollars in business loans. The CUSO is owned by Southeast Corporate and Georgia Central corporate credit unions.
